

The First National Conference on Nanotechnology

The First National Conference on Nanotechnology was held on April 26–28th, 2007 at Wrocław University of Technology under the patronage of Minister professor Krzysztof Kurzydłowski. The Scientific Committee was headed by professor Jacek Kossut from the Institute of Physics of the Polish Academy of Sciences from Warsaw. The organizing committee was headed by dr Ryszard Korbutowicz from Wrocław University of Technology. The conference was attended by about 270 people from dif-

ferent institutions and universities. A plenary session and five topical sessions were organized to cover various areas of nanotechnology, e.g. nanophotonics, nanobiotechnology, surface engineering, materials engineering and nanoparticles.

The organizing committee decided that this conference will be held periodically, so the Second National Conference on Nanotechnology is to be organized next year in Cracow.
